

Ethnicraft

OFFICE

collection 2022

Our designs are the perfect choice to curate warm and inspiring workspaces.

For more than 25 years, we have been creating timeless furniture and accessories manufactured from quality materials. True to our values, we have maintained our goal to produce good design, distinguished by authenticity, simplicity and quality, as well as creativity and innovation. We rely on our unique expertise to create singular designs ready to enhance daily life, durably. We create collections for every room or space: from the furniture that defines the purpose of an area, to the objects that layer it with meaning.

Today, the Ethnicraft collection boasts numerous designs created specifically to make life at work easier. Our products are functional, flexible, beautiful and durable: the perfect choice to curate a warm and inspiring workspace. Because the idea of a cold and impersonal office belongs to the past.

ICONS YOU MIGHT COME ACROSS IN OUR PRODUCT CATALOGUE

- **OILED**
The items marked with this icon are finished with a natural oil. Visit pages 108-111 for more information on how to take care of our oiled furniture.
 - ∇ **VARNISHED**
The items marked with this icon are finished with varnish. Visit pages 108-111 for more information on how to take care of our varnished furniture.
 - Ⓑ **BRUSHED**
The items marked with this icon are brushed. This finishing gives our furniture more depth. The rougher surface highlights the grain of the wood.
 - Ⓒ **CONTRACT GRADE**
The items marked with this icon are EN and/or BIFMA certified.
- 100 % **SOLID WOOD**
The items marked with this icon are 100% made out of solid wood.
- FSC® **FOREST STEWARDSHIP COUNCIL®**
The items marked with this icon carry the FSC® 100% label. Visit page 113 for more information on the organisation that promotes responsible management of the world's forests.

how to take care of our products

about natural materials

The beauty of natural materials lies in its peculiarities and imperfections. That is what separates true beauty from the artificial. Variations in wood grain and colour, knots, medullary rays and other natural characteristics are inherent in solid wood. These are far from flaws, but an intricate part of its character. Natural stone can also have minor pitting or surface fissures. We believe that these imperfections contribute to the charm of Ethnicraft products.

Wood, like any other natural and porous material, continues to absorb and release humidity throughout its life. Although Ethnicraft designs furniture that adapts well to the hydrometric conditions of its environment, some cracking or movement may occur. Please do not be alarmed, this is a normal response to the furniture's environment.

TIMELESS DESIGN

All our designs are intentionally timeless. They withstand trends and associate well with different styles, and they can be moved from one space to the next, carrying over the stories of one lifetime into another. Our collections go back to the essence of what we believe is good design: pieces full of character, made from quality materials that age beautifully.

DEVOTION

We create collections for every room or space: from the furniture that defines the purpose of an area, to the objects that layer it with meaning. Nothing excites us more than seeing how people love and use our products in the story of their life.

We create the foundations of your home, to inspire the stories of your life.

CRAFTSMANSHIP

Outstanding craftsmanship is at the core of our brand, and behind the simplicity of our pieces lies a constant drive for innovation.

Incorporating advanced techniques to our process of creation, each new design is revised and reworked to the last detail: every curve, texture and line reflects our design values.

general tips & tricks

- Recommended humidity in the room for interior products: between 40% and 60%.
- Ideal room temperature: 21°C/70°F during the day, not below 14°C/57°F at night.
- To prevent colour differences, do not place furniture or accessories in direct sunlight, move objects placed on the furniture from time to time and open extendable tables on a regular basis.
- Avoid exposure to extreme conditions: do not place furniture or accessories near heating sources or air-conditioned spaces.
- To prevent staining, we recommend that any spills are removed immediately.
- When cleaning the surface, always work in the direction of the wood grain.
- Use place mats and/or coasters to prevent hot pots and pans, or cold glasses and bottles, from damaging items.
- Do not drag the furniture along the floor, always lift the furniture when moving.
- Always ensure water and solutions used to clean the floor do not come into contact with the furniture's base, as it might leave permanent marks.
- Indoor products are not intended for outdoor use. An outdoor product will always indicate so in its name.
- Last but not least, we always recommend to carefully read the care instructions specific to your item.

all hard surfaces & materials

REGULAR CARE

For dusting, use a dry cloth. For cleaning or in case of a spill, use a damp cloth and natural soap. For wooden items, wipe in the direction of the grain. Do not use soap containing detergent or other chemicals. Dry with a soft clean cloth to prevent spotting.

It is always recommended to protect any surfaces with coasters, mousepads, or placemats. Repetitive daily use or heat can damage the finish.

Always move objects such as books, flowerpots, vases etc from time to time. Ensure any excess water or dampness is wiped dry immediately to prevent marking the surface.

For glass and mirror surfaces, wipe with warm water or a neutral glass cleaner applied to a soft, lint-free, cloth.

varnished furniture

WOOD

Our varnished wooden items are finished with a protective varnish. This finish gives the item its desired colour and offers a good protection against stains, even though with this extensive treatment, spills should be removed immediately.

MINERALS

The Minerals tabletops are varnished with a water-based finish to repel common substances and fluids such as coffee, tea and wine. However, this protective coat is no fool proof guarantee against stains. In case of a spill, remove it immediately.

oak furniture

OAK OILED

Our oiled oak furniture is finished with a pigmented hardwax oil. This retains the wood's natural colour and has the advantage that stains do not penetrate the wood as easily. However, this is no fool proof guarantee against stains. In case of a spill, remove it immediately.

REFRESHING THE SURFACE

To refresh or remove superficial stains we recommend *Osmo Liquid Wax Cleaner (3029)*. This product cleans and regenerates the character of the wood and slightly reinforces the original protective coating. *Osmo Liquid Wax Cleaner* is no guarantee against stains.

THOROUGH CARE

The original hardwax coating may need to be renewed over time. We recommend using *Osmo Hardwax Oil, Natural (3041)*. In case of discolouration, stubborn stains or to remove a superficial scratch, we advise sanding the entire surface first. Make sure the surface is clean and dry before applying the Hardwax Oil. Spread evenly over the surface and remove any excess product to avoid spots after drying.

how to take care of our products

teak furniture

TEAK NATURAL

Our natural teak range comes without any finish or protective treatment. The wood is merely polished, allowing the natural oils to rise to the surface. The high density of teak wood has the advantage that stains do not penetrate the wood as easily. Even with these characteristics, spills should be removed immediately.

PREVENTIVE TREATMENT

For extra protection from the outset, a protective coating can be applied. We recommend *Occulto Oil (9911)*. This will seal the pores of the timber and create a natural protection. Stains and marks should still be removed immediately.

THOROUGH CARE

To remove stubborn stains or superficial scratches, extra fine sandpaper can be used. Always sand in the direction of the woodgrain.

TEAK VARNISHED & WAXED

The carved parts of our Tabwa collection are varnished and, to achieve its signature shine, a wax is applied. This finish gives the desired colour and offers protection against stains. Even with this extensive treatment, spills should be removed immediately.

REFRESHING THE SURFACE

Dust the surface first. Apply dark brown liquid beeswax using a soft cloth or furniture brush. Allow the beeswax to dry. Buff with a clean soft cloth and/or furniture brush. Repeat until desired level of shine is reached.

marble furniture

Marble is a natural product, so it needs to be treated with care. Ethnicraft marble furniture is finished with an oil protection. This is a transparent layer that does not affect the look of the polished marble.

However, it is important to know that direct contact with abrasive/high acidity products, even natural (lemons, wine, ...), should be avoided. We strongly recommend the use of coasters to prevent cold glasses and bottles from leaving marks on the furniture. Due to the porous nature of marble, remove spills immediately as this could cause permanent stains.

THOROUGH CARE

In the case of any unexpected dried spills or marks we recommend using a high quality cleaner specified for natural stone surfaces. For stubborn stains and traces, we recommend lightly rubbing with fine steel wool in a circular motion.

metal structures

We advise the following:

- Dust regularly using a soft dry cloth.
- For a more thorough cleaning, use mild soap and warm water. Rinse with clean water and wipe dry.
- Do not use steel wool, sandpaper, mineral acid, bleach or chlorine cleaners on metal surfaces.
- Do not drag the furniture along the floor, as it might damage the protective coating, cause rusting or leave permanent marks on the floor.
- Always lift the furniture when moving them from place to place.
- Always ensure water and solutions do not come into contact with the furniture's base and the wooden floor, as it might leave permanent marks on the floor. Some wood species, such as oak, contain tannin, which causes the wood to react with metal and leave permanent stains.

upholstered furniture

FABRICS

Upholstered items should not be washed unless clearly indicated on the care label attached to the item. Taking off the cushion covers and washing these in a machine (even at a low temperature) might lighten the colour and shrink the fabric.

If pilling should occur, don't be alarmed. It's a result of excess fibre coming off the fabric or from external sources. This is not a defect but a characteristic of many upholstered fabrics.

To keep upholstery in optimal condition we recommend the following:

- To remove pilling, we recommend using an antipilling machine.
- Avoid placing item in direct sunlight.
- For dusting or removing crumbs take a clean cloth or soft brush and wipe down upholstery. Do not rub.
- We do not recommend vacuuming. If you do so, use the lowest suction and a soft upholstery attachment.
- Treat spills immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Do not rub.
- In case of a stain, use a clean, slightly damp white cloth, blotting from the outer edge to the centre of the stain.
- Do not use any chemical products on your upholstery.
- If in doubt, always refer to the care label specific to your item.

LEATHER

The upholstery of our leather chairs and sofas should not be washed or dry-cleaned. Many of the hides used are left in their purest form. This means there is little or no surface treatment, allowing for the unique natural beauty of each hide to come through.

To keep the leather in optimal condition we recommend the following:

- To avoid discolouration do not place the sofa in direct sunlight.
- Frequently wipe the leather sofa down with a clean, dry cloth.
- Treat spills immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Don't rub.
- In case of a stain, use a clean, slightly damp white cloth, blotting from the outer edge to the centre of the stain. Do not use any chemical products not designed for leather.
- Use a towel to evenly dry the leather. Do not use a hairdryer for this purpose as it is likely to dehydrate the leather.
- Apply leather conditioner when the leather feels dry.

our commitment

Wood has always been the core material in the Ethnicraft range. We are deeply aware of the impact of our industry on the environment and we take environmental issues to heart: the origin of the wood, the energy we use in the production and distribution process, the treatment of the products and waste reduction – we try to be as environmentally friendly as possible.

In a world where trends change from one year to the next, we want to create design that will last for generations. Our timeless designs associate well with different styles, while our solid wood is strong and ages incredibly well with time. The ultimate noble and renewable material, all of our wood is sourced from responsibly and carefully managed forests.

NO WASTE

Production waste such as leftover logs, wood and sawdust are re-used for other purposes. The sawdust from logs is either used as fuel for the drying ovens or compressed as a base for pellets. All the leftovers from cutting planks to size are recycled and used as base material or as box joints for panels.

FSC® LABEL FOR OUR FURNITURE

Our commitment to the environment is reflected by the FSC® CoC (Chain of Custody) certification of our distribution centres. The FSC® label guarantees products come from forests that are managed so that they meet the social, economic, and ecological needs of present and future generations. In the case of Ethnicraft NV and Azur, the CoC certificate guarantees that the company is perfectly placed to buy, stock and sell products with a specified FSC® certificate, originating from sustainably managed forests, controlled sources and reclaimed materials, or a mixture of these.

The ultimate noble and renewable material, our wood is sourced from responsibly and carefully managed forests.

QUALITY CONTROL AND TESTING

Producing furniture and accessories at the highest quality, strength and safety is extremely important to us. To ensure this, we test all our products throughout the entire development process. We test on factors such as stability, durability, and safety for domestic use, to a level that meets or exceeds the highest furniture standards within the industry. Our internal protocols are based on the standards set by ANSI (American National Standards Institute) and BIFMA (North American Business and Institutional Furniture Manufacturers Association). Moreover, specific products within our collections are certified by independent external facilities in order to meet the European requirements for contract-grade use, along with specific requirements based around ecological and health regulations such as toxic substance use and flammability. Details on our testing can be found on our website and within our catalogues.

TEXTILE SOURCING AND SUSTAINABILITY

Our cushion covers, throws and rugs are crafted from the best weaving yarns which are primarily produced in Belgium, France, Italy, Peru and Pakistan. By consciously choosing natural fibres – such as cotton, wool, and Belgian linen – we stay true to our values: design pieces full of character, made from quality materials that age beautifully.

Cushion inners are made in The Netherlands and are Oeko-Tex 100 certified. The Oeko-Tex label is an international standard that guarantees no harmful substances are contained within the final product. It certifies both natural and synthetic fibres. For the filling of our cushions, we have consciously opted for duck feather. As a natural product, duck feather far surpasses synthetic alternatives in terms of durability and sustainability. All cushion fillers carry the Downpass certification to guarantee high quality, ethical sourcing, and traceable supply chains.
